PRODUCT DESCRIPTION & TYPICAL APPLICATIONS

OUR CREATIONS

We create all our products for you using raw recycled PET felt. Each product is meticulously crafted by our team of designers to meet the expectations of our most discerning customers. We fabricate our products based on the latest digital technologies available on the market ensuring quality, precision, speed of production, and flexibility in adapting to the individual needs of the client.

We merge sublimated aesthetics with high quality design, acoustics and sound insulation properties in our products. Our goal is to transform spaces into interior places with unique, personalized, high-quality products, while simultaneously enhancing the comfort of working and living for our customers.

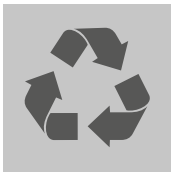
ENVIRONMENTAL MISSION

We are also committed to environmental sustainability. Our environmental strategy involves deploying increasingly precise progress plans at our sites and with our suppliers. This is an essential step in reducing or eliminating the environmental footprint of our products.

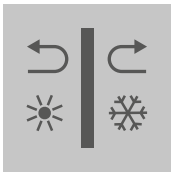
PRODUCT FEATURES



recyclable

decorative

fire-rated



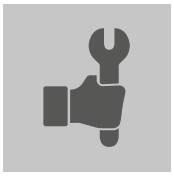
insulated

acoustical

VOC free

printable

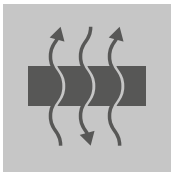
buffered



easy-to-install

tackable

light weight



ventilated

DEFELT ECO-FRIENDLY

Take a look into the sustainable supply chain of DeFelt

CIRCULARITY & AFTER SALES

repair, recycling, and upcycling of used and unsold products, remote maintenance

SOURCING

certification schemes to measure the environmental footprint of input materials

PRODUCT DESIGN AND R&D

digital prototyping, circular product design, low-tech product, and durable materials

DISTRIBUTION

route and packaging optimization and prescriptive supply chain analytics

INVENTORY MANAGEMENT

intelligent warehouse operations: building materials, lights-out

PRODUCTION

low-energy processes using renewables, recycling of production waste, and recyclable packing

DEFELT FELT

PET is made from collected, compressed, shredded, and melted recycled plastic bottles to produce plastic fibers, which are needle-punched together in layers to make a sturdy sheet of DeFelt felt.

The DeFelt® logo is a nationally and internationally registered trademark, exclusively owned by DeFelt sp. z o.o.. It cannot be reproduced or used for commercial or other purposes without prior written authorization from DeFelt. DeFelt has ensured that the information contained in this catalog is as accurate as possible; however, it declines all responsibility for any errors. DeFelt reserves the right to make modifications and improvements of a technical or aesthetic nature to the products at any time without notice. The reproduction (even partial) of this catalog, for any reason and with any means, is prohibited without the prior written permission of DeFelt.

Please note that the actual appearance of DeFelt felt products may differ or vary slightly from the images shown in the catalog. This is because each type and batch of felt and fabric has its own unique characteristics. We view this as an advantage for each product is unique and unrepeatable. Keep in mind that the colors of PET, felts, and fabrics may vary slightly from what you see in the catalog. For the most accurate representation, we recommend referring to our sample book or sample individually sent.

Due to the production process of both fiber and PET felt, there may be slight variations in material between different production batches. Additionally, please take into consideration that PET panels have distinct left and right sides so always try to present only one side of the sheet. Due to the manufacturing process, the felt board may show differences in shade depending on the direction of laying. We recommend laying all pieces in one direction to avoid undesirable visual effects.This is particularly important to consider when installing larger structures, such as wall-mounted panels or acoustic drop ceiling.
